Remote Evaluation and Assessment Tools

Below is a list of norm-referenced tools appropriate for remote eligibility evaluation and a list of non-norm-referenced tools appropriate for remote functional child assessment.

The lists were derived from a variety of sources, including the DaSy and ECTA Centers' **Norm-Referenced Assessment Tools for Children Birth to Age Five Years with Potential for Remote Administration for Eligibility Determination**. A tool's inclusion in this list does not indicate ESIT endorsement. It is the responsibility of the evaluation team to review any tool for appropriate content, validity and reliability. See the ECTA video webinar **Applying Assessment Principles to Determining Eligibility Remotely** for more information.
