

# How are home visitors putting their skills to use?

Based on 2,647 home visits conducted, TA logs on 377 staff, and responses from 212 home visitors and 69 supervisors for a Program Practices Survey in Nurse Family Partnership and Parents as Teachers Programs

74% of home visitors select content to cover during visits based on suggestions from the NFP/PAT model.

Home visitors also select content because it is related to a family goal (42%) or an identified strength or need (43%).

Out of 2,647 home visits, home visitors initiate or follow up on 2,076 referrals, most often related to:

Health, Mental Health & Substance Abuse

437

referrals or follow-ups

Social Services

390

referrals or follow-ups

Education & Employment

342

referrals or follow-ups

## Topics covered most frequently during visits include...

Parent-Child Interaction

Parent's Behavioral & Emotional Care of Child

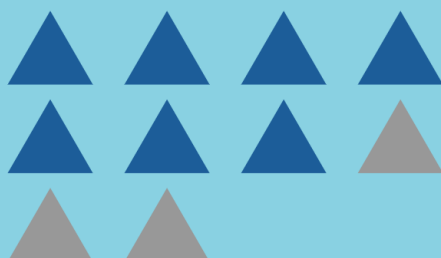

Child Development, Stages & School Readiness

Child Health

Home visitors observe interactions between the caregiver and child during 7 out of 10 visits\*

\*Note: 17% of all visits were prenatal.

In over half of all visits, home visitors also:

Conduct informal observations or assessments of the child and/or caregiver (55%).

Provide emotional support to the caregiver (52%).

Share feedback on or evaluate interactions between the child and caregiver (52%).
